About Me

BS Degree (information technology and computing) seeks to gain experience and improve my knowledge in fields concerning IT (software-hardware-network) as I preferred to improve my programing skills because it's my passion to become a professional and achieve advanced levels in programing.

Some of my interests:

- Still up-to date on any new technology especially concerning developing and programing.
- Interest to learn and get experience in any fields concerning computers and mobile phones.
- Interest in data analytics and Artificial Intelligence, NLP
- Interest in web scrapping and automation.

Education

- **2009 - 2013 Arab Open University**
  BSc Computer Science (Information Technology and Computing)
  GPA : 2.9_Award GPA:3.5
  Graduation project : WEB development (Social media network including Google_Map) clone for FB and twitter

Certificates

- **Microsoft office specialists outlook associate(office 2019)**
  Issued Apr 2023
  Credential ID wEVPC-48Xr
- **Microsoft power platform fundamentals**
  Issued Mar 2023
  Credential ID wBrMA-2Fb6
- **Huawei Certification hcia AI**
  Issued May 2022
- **R & Python For Data Analysis**
  Issued Apr 2021

- **Python Programming & automation**
  Issued May 2019
- **Django Website Build**
  Issued Dec 2018

Work Experience

- **2019- till now**: Python developer (Data Analysis)
- **2016 – 2018 :** Python Developer- WEB developer(Django)-UI(PyQt5)
- **2012-2015 : IT support software/hardware windows-Unix(Troubleshooting-Upgrading-Maintenance)**

Programing Skills

Web Development
- Knowledge of data structures, algorithms and complexity analysis
- Developing internal programs/websites and databases in multiple languages include python framework (Django), HTML5, CSS, JSON, PHP, Database(MySQL, PostgreSQL ,SQL Server) front-end(JavaScript, Ajax, JQuery)
- Experience with multiple web servers include Apache and IIS.
- Experience with WAMP, LAMP and XAMP servers coding and troubleshooting.
- Experience with accessible web-design.
- Experience with analyzing and troubleshooting large-scale distributed systems (network analysis, performance, and application issues).

Back – end   & stand-alone development:
- Experience with python (automation – UI)
- Experience in Data Analysis
- NLP developer

Technical Skills

Operating System
- Knowledge and experience in using Microsoft 365 and power platform
- Expert using Windows OS browsing, detecting viruses and get solutions, using command shell, install drivers, expert using the Microsoft office (word, Access, Excel, Outlook(export and import accounts, work with pst files), and Visio).
- Good knowledge with UNIX and Linux OS browsing, using command shell, installing packages, troubleshooting.

- Small knowledge with Mac and some researches about the usage of this operating system.
- Good knowledge and some experience in network, routing, subletting, FTP. Install and configure routers.
- Design and implement Network security, Analyze packets.

Other Skills

- Knowledge and little experience using Photoshop cs2, cs3, cs5, cs6.
- Research and browsing on the internet.

Language Skills

- Arabic: Fluent native language
- French: medium read, medium write, medium spoken.
- English: excellent read, medium write, excellent spoken.
